DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-22, drawn to determining a roll gyro bias residual, classified in class 244, subclass 171.
 - II. Claims 23-40, drawn to gain scheduling gyro calibration and attitude determination, classified in class 244, subclass 171.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as calibrating the gyro in response to a roll gyro bias residual. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
